Xuelun (Sellen) Wei

435 Dexter Ave N, Apt 535, Seattle, WA 98109 Cell Phone: 480-363-5967 Email: sellen.wei@gmail.com

SUMMERY

Results-orientated, self-motivated Engineer with 3+ year working experience, worked in a fast-paced competitive start-up company. Ability to dig into issues, debug and solve problems individually.

SKILL

Programming: Object-oriented design using **Swift4**, **Java**, Objective C;

Web & Data: REST API, JSON, MySQL, NoSQL (MongoDB), database operation using SQL Scripts & tools: Git, Docker, MAMP, Apache Tomcat, JUnit, JMeter, Amazon Web Service EC2

EDUCATION

> Arizona State University, Tempe, Arizona GPA: 3.9 / 4.0 2013 - 2015

Master of Science and Engineering in Electrical Engineering

> Sichuan University, Chengdu, China GPA: 3.7 / 4.0 2009 - 2013
Bachelor of Science and Engineering in Electrical Engineering

WORK EXPERIENCE

> iOS Developer, Mobile Team, Hestan Smart Cooking Inc.

2018.2 - present

Smart cooking company provides mobile control solution for Hestan Cue, GE and Arpa cooking.

- Developed high-quality iOS application that works with smart cooking devices using Xcode in Swift and Objective C. Heavily involved in App's redesign.
- Worked with product team to provide UI of the app while optimizing existing functionalities and enhancing the new features. Participated in Muti-platform communication & devices pairing flow.
- Generated Unit test(Quick/Nimble & XCTest) to improve test coverage.
- Participated in QA process, identified and resolved 10+ bugs.

Design Engineer, Dialog Semiconductor, Inc

2015.2 - 2018.2

Dialog Semiconductor is the top power management supplier for Apple/Samsung/Huawei portable devices.

- Worked in fast-paced design group to develop chip level hardware system, daily job includes improving and simulating high-quality products using software tools based on Linux environment.
- Investigated design structures to meet market requirements. Products contributed 30% revenues.
- Utilized LabView to automate test for double production test coverage and efficiency.
- Evaluated test data of over 80 test cases, debugged 10 test failures and performed regression testing
- Designed test strategies individually for debugging across multi-platforms.

PROJECT EXPERIENCE

> iOS Apps Development (20+ apps with Xcode 9 & Swift 4)

Eg. Pokemon Go, Whatsapp, QuizUp and Yahoo Weather.

- Developed 20+ IOS apps based on MVC (Model-View-Control) design pattern using Swift 4.
- Made asynchronous API calls and use the JSON format for server communication.
- Used cloud- based infrastructure FireBase to store and retrieve data from Google Web Service.
- Implemented AI apps using iOS 11's new CoreML machine learning framework.
- Created 3D objects in augmented reality and created animations and real-life interactions using Apple's latest ARKit framework.

> Dashi, A Personalized Restaurant Recommendation Web Service (Java)

Dashi, aims to use personalization to improve restaurant search and recommendation based on search history and favorite record.

- Developed an interactive web page (HTML5/CSS/Javascript) providing 3 main APIs to handle the HTTP requests of updating preference, searching / pushing recommended restaurants.
- Built a customized web service (Java servlet, REST API) to fetch restaurant data from Yelp API and store user preferences (MySQL/MongoDB).
- Improved content-based recommendation precision/recall by developing a collaborative filtering algorithm and matching similar restaurants based on categories.
- Improved content-based recommendation precision/recall by developing a collaborative filtering algorithm and matching similar restaurants based on categories.

ELK: User Behavior Analysis

Implemented ELK to analysis users behavior based on location, device, service provider and etc.

- Used Timelion timeline to identify peak season for resource usage on ElasticSearch project.
- Utilized **Kibana** to analyze the geographic distribution of new customers and returning users.
